

Summary Round-Up of Parental Control Tools for the Internet

March 2011

About this Document

This document is not a review of web control tools, but a report listing which tools are available and providing as accurate a list as is possible of their features and capabilities. Descriptions of the products and services are taken directly from the manufacturers' sites, and are in their own words. The Online Social Savvy team has not tested nor evaluated any of these tools in the process of writing this report. We do not guarantee the accuracy of the information. The list of tools provided is not represented as being exhaustive.

Corrections and updates to this information including notifications of tools not listed for addition to this *Round-Up*, can be submitted to the OSS team at: onlinesocialsavvy@gmail.com

Categories of Parental Control Tools

Parental Control (PC) tools are software or services intended to help you, as parents, to monitor and control your child's online activities. You need to monitor and control how and when your children operate online, to keep them safe, to teach them proper social media manners, and to widen their world.

The flavors and varieties of PC tool options include:

	<p>violence, or depression.</p> <ul style="list-style-type: none"> • Sends alerts to your email and/or cell phone. • Helps you team with your child to be safe on the Internet. 	<ul style="list-style-type: none"> • Built-in encryption to protect your child's privacy • Summary reports • Custom to your family's needs 	
<p>PC Acme Monitor secure monitoring software</p>	<p>Products of the PC Activity Monitor™ (PC Acme™) line are designed for invisible and undetectable monitoring of PC users' activity. PC Acme™ software works under Windows 2000/XP operating systems. All the data collected by the program module for invisible monitoring, called "agent", are saved to the hidden encrypted log file located on the machine under monitoring. The monitoring agent works in the background transparently for the user, on the level of OS kernel driver. All PC Acme™ surveillance products support UNICODE, i.e. they are able to capture information written in languages with hieroglyphic writing, like Chinese. PC Acme™ computer monitoring software products are well-protected against anti-monitoring tools. They are completely invisible, and even an experienced user cannot locate, stop or destroy this monitoring program. Information from the invisible log file after it has been decoded and processed, is entered to the database. Reports from the database are converted into HTML format.</p>	<ul style="list-style-type: none"> • Interception of all languages (UNICODE support) • Window text capturing • Keystroke capturing • Clipboard capturing • Capturing of text from Microsoft Office documents • Internet monitoring (visited web sites) • Recording of email, instant messengers and chats • Recording of system logon name/password • High transparency and invisibility in the system • Smart-looking reports converted into HTML format • Archiving of recorded data stored in the database • Silent installation of the monitoring agent • Client/server architecture • Remote monitoring via a network • Centralized data storage, processing and analysis • Secure transmission of log files 	<p>\$29.95</p>
<p>Trend Micro Titanium Internet Security - including PC-Cillin</p>	<p>Introducing a powerful new way to safeguard your PC and your family. Trend Micro Titanium Internet Security uses cloud technology to stop viruses and spyware when it matters most: before they reach your computer. Not only is this a whole new way to protect your computer, it's light on memory, so it won't slow your computer down.</p>	<ul style="list-style-type: none"> • Internet security • Spam-blocker • Customizable parental controls • Data theft protection • Processing done "in the cloud" means it uses half the disk space and memory of other security products 	<p>\$69.95</p>

Summary Round-Up of PC Tools

Tool	Description	Key Functions	Price (USD)
PC Home Software	If you are concerned your child may be spending too much time online or playing games this type of software will offer a solution. It allows you to set limits on how much time your child spends on the computer or online. You can share the same computer among your children by setting an individual time table for each child. Also you can prevent the PC usage until the specified date, after the specified date or between specified dates.	<ul style="list-style-type: none"> • Limit PC time access • Set user security restrictions to Windows system resources • Internet security • Folder guard • Network machines management • Multi-user interface 	
PC Pandora software	Whatever anyone is doing on your PC - whether it's using secret email accounts, chatting with unknown friends, accessing secret dating profiles or even your private records - you'll know. PC Pandora records dozens of processes every single minute to keep you safe. PC Pandora can help you record computer activity and find out about secret email accounts, chat partners, dating site memberships and more. Peace of mind is just a short click away. Review by ShoutDown.	<ul style="list-style-type: none"> • Records every email, instant message, password, keystroke • With Live! allows you to see it online from anywhere you are • Like an invisible Tivo® for your computer 	From \$69.95
PC Tattletale Internet monitoring software	<i>This Internet Monitoring Software Records Everything Your Child Does When They Go Online</i> As a parent, you have to ask yourself: " <i>Am I really comfortable with what my child is doing online?</i> " For most parents the answer is - no. And it is because most parents don't really know what their children are doing online, who they talk to, or what private information they share.	<ul style="list-style-type: none"> • Monitors MySpace.com • Password capture and keystroke recording • Chat recorder • Screen shot recording • Email monitoring and reporting • Web site history monitor • PC software monitoring • URL specific web filtering • Total stealth operation 	\$49.99

Windows Live Family Safety software	The kids are online and you're busy—Family Safety is there to help. Use activity reports to monitor your kids' computer activity. Choose websites, games, and programs they can access. Even set time periods when they can use the computer. So go ahead, be busy. Family Safety can help keep an eye on things.	<ul style="list-style-type: none"> • SafeSearch for popular search engines • Works great with Windows • Activity reports to review your kids' online activities • Block content or limit kids to age-appropriate sites • Limit email and IM access to approved contacts • 	Free software
X3watch and Safe Eyes accountability and filtering software	<p>X3watch is an accountability software program helping with online integrity. Whenever you browse the Internet and access a site, which may contain questionable material, the program will record the site name, time, and date the site was visited. A person of your choice (an accountability partner) will receive an email containing all possible questionable sites you may have visited within the month. This information is meant to encourage open and honest conversation between friends and help us all be more accountable.</p> <p>Safe Eyes is not only a filter but also has built in accountability reports just like x3watch. That's one of the many reasons why Safe Eyes is the #1-rated Internet filtering software.</p>	<p>Accountability:</p> <ul style="list-style-type: none"> • Email accountability report • User control for one or multiple users • Available for mobile phones <p>Filtering:</p> <ul style="list-style-type: none"> • Content controls for web sites • Program controls for Instant Messengers, P2P file sharing and other harmful programs • Time controls • Usage logging including web sites visited, programs used, and IM chats • Usage alerts - instant notification via email, text message or phone call when inappropriate web sites are visited 	<p>X3Watch Pro for up to 3 users: \$7/mo</p> <p>X3watch for one user: Free</p> <p>Safe Eyes software: \$49.00</p>
Yahoo! Kids kids-safe search engine	<p>Yahoo!'s entertainment and education site for children aged 6 through 12.
